Introduction

The TTI TriMetrix® DNA Coaching Report was designed to increase the understanding of an individual's talents. The report provides insight to three distinct areas: behaviors, driving forces and competencies. Understanding strengths and weaknesses in each of the three areas will lead to personal and professional development and a higher level of satisfaction.

The following is an in-depth look at your personal talents in the three main sections:

Behaviors

This section of the report is designed to help you attain a greater knowledge of yourself as well as others. The ability to interact effectively with people may be the difference between success and failure in your work and personal life. Effective interaction starts with an accurate perception of oneself.

Driving Forces

This section of the report provides information on the why of your actions, which with application and coaching, can tremendously impact your valuing of life. Once you know the motivations that drive your actions, you will immediately be able to understand the causes of conflict.

Integrating Behaviors And Driving Forces

This section of the report will help you blend the how and the why of your actions. Once you can understand how your behaviors and driving forces blend together, your performance will be enhanced and you will experience an increase in satisfaction.

Competencies

This section presents 25 key competencies and ranks them from top to bottom, defining your major strengths. The skills at the top highlight well-developed capabilities and reveal where you are naturally most effective in focusing your time.

Introduction Behaviors

Behavioural research suggests that the most effective people are those who understand themselves, both their strengths and weaknesses, so they can develop strategies to meet the demands of their environment.

A person's behaviour is a necessary and integral part of who they are. In other words, much of our behaviour comes from "nature" (inherent), and much comes from "nurture" (our upbringing). It is the universal language of "how we act," or our observable human behaviour.

In this report we are measuring four dimensions of normal behaviour. They are:

- How you respond to problems and challenges.
- How you influence others to your point of view.
- How you respond to the pace of the environment.
- How you respond to rules and procedures set by others.

This report analyzes behavioural style; that is, a person's manner of doing things. Is the report 100% true? Yes, no and maybe. We are only measuring behaviour. We only report statements from areas of behaviour in which tendencies are shown. To improve accuracy, feel free to make notes or edit the report regarding any statement from the report that may or may not apply, but only after checking with friends or colleagues to see if they agree.

*"All people exhibit all four behavioural factors in varying degrees of intensity."
—W.M. Marston*

Communication Tips

This section provides suggestions on methods which will improve John's communications with others. The tips include a brief description of typical people with whom he may interact. By adapting to the communication style desired by other people, John will become more effective in his communications with them. He may have to practice some flexibility in varying his communication style with others who may be different from himself. This flexibility and the ability to interpret the needs of others is the mark of a superior communicator.

When communicating with a person who is dependent, neat, conservative, perfectionist, careful and compliant:

- Prepare your "case" in advance.
- Stick to business.
- Be accurate and realistic.

Factors that will create tension or dissatisfaction:

- Being giddy, casual, informal, loud.
- Pushing too hard or being unrealistic with deadlines.
- Being disorganized or messy.

When communicating with a person who is ambitious, forceful, decisive, strong-willed, independent and goal-oriented:

- Be clear, specific, brief and to the point.
- Stick to business.
- Be prepared with support material in a well-organized "package."

Factors that will create tension or dissatisfaction:

- Talking about things that are not relevant to the issue.
- Leaving loopholes or cloudy issues.
- Appearing disorganized.

When communicating with a person who is patient, predictable, reliable, steady, relaxed and modest:

- Begin with a personal comment--break the ice.
- Present your case softly, nonthreateningly.
- Ask "how?" questions to draw their opinions.

Factors that will create tension or dissatisfaction:

- Rushing headlong into business.
- Being domineering or demanding.
- Forcing them to respond quickly to your objectives.

When communicating with a person who is magnetic, enthusiastic, friendly, demonstrative and political:

- Provide a warm and friendly environment.
- Do not deal with a lot of details (put them in writing).
- Ask "feeling" questions to draw their opinions or comments.

Factors that will create tension or dissatisfaction:

- Being curt, cold or tight-lipped.
- Controlling the conversation.
- Driving on facts and figures, alternatives, abstractions.

Descriptors

Based on John's responses, the report has marked those words that describe his personal behaviour. They describe how he solves problems and meets challenges, influences people, responds to the pace of the environment and how he responds to rules and procedures set by others.

The Success Insights® Wheel

The Success Insights® Wheel is a powerful tool popularized in Europe. In addition to the text you have received about your behavioural style, the Wheel adds a visual representation that allows you to:

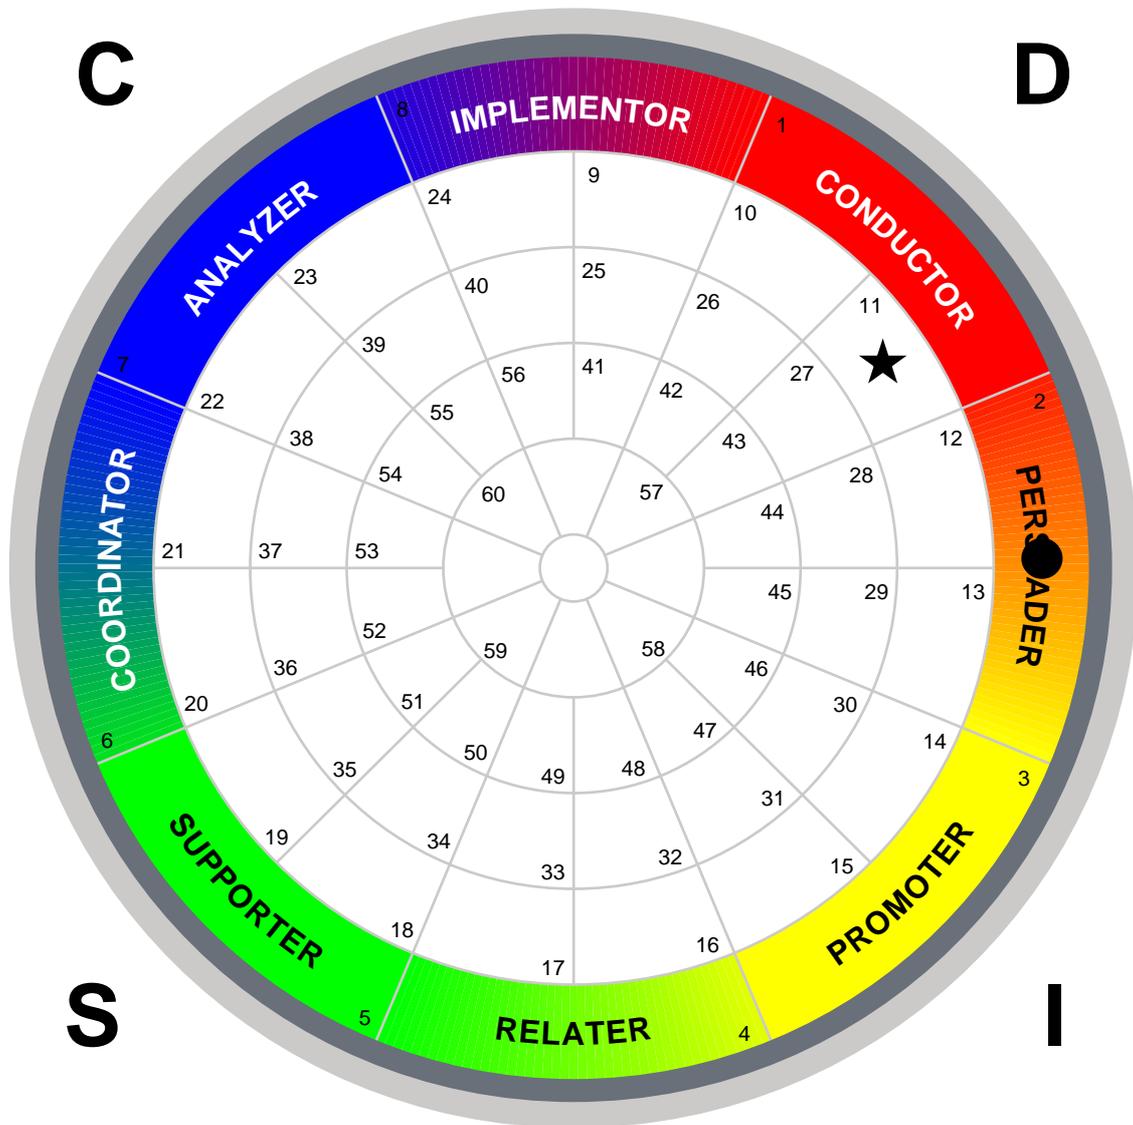

- View your natural behavioural style (circle).
- View your adapted behavioural style (star).
- Note the degree you are adapting your behaviour.
- If you filled out the Work Environment Analysis, view the relationship of your behaviour to your job.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behaviour. The further the two plotting points are from each other, the more you are adapting your behaviour.

If you are part of a group or team who also took the behavioural assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding and appreciation can be increased.

Understanding Your Driving Forces

Eduard Spranger first defined six primary types or categories to define human motivation and drive. These six types are Theoretical, Utilitarian, Aesthetic, Social, Individualistic and Traditional.

With TTISI's additional insights into Spranger's original work, the 12 Driving Forces® came to life. The 12 Driving Forces® are established by looking at each motivator on a continuum and describing both ends. All of the twelve descriptors are based on six keywords, one for each continuum. The six keywords are Knowledge, Utility, Surroundings, Others, Power and Methodologies.

You will learn how to explain, clarify and amplify some of the driving forces in your life. This report will empower you to build on your unique strengths, which you bring to work and life. You will learn how your passions from 12 Driving Forces® frame your perspectives and provide the most accurate understanding of you as a unique person.

Please pay careful attention to your top four driving forces, as they highlight what most powerfully moves you to action. As you examine the next tier of four driving forces, you will recognize they may have strong pull for you, but only in certain situations. Finally, when reviewing the bottom four driving forces, you will identify your varying levels of indifference or total avoidance.

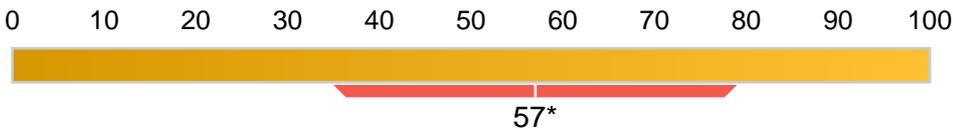

Once you have reviewed this report you will have a better grasp of one of the key areas in the Science of Self™ and will:

- Identify and understand your unique Driving Forces
- Understand and appreciate the Driving Forces of others
- Establish methods to recognize and understand how your Driving Forces interact with others to improve communication

Primary Driving Forces Cluster

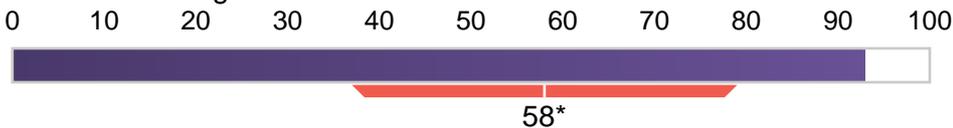

Your top driving forces create a cluster of drivers that move you to action. If you focus on the cluster rather than a single driver you can create combinations of factors that are very specific to you. The closer the scores are to each other the more you can pull from each driver. Think about the driver that you can relate to most and then see how your other primary drivers can support or complement to create your unique driving force.

1. Resourceful - People who are driven by practical results, maximizing both efficiency and returns for their investments of time, talent, energy and resources.

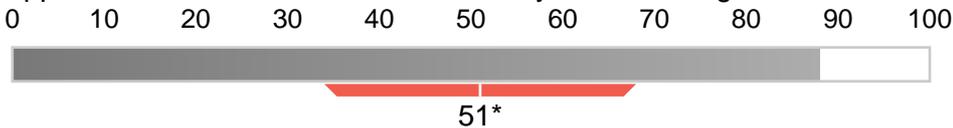

100

2. Objective - People who are driven by the functionality and objectivity of their surroundings.

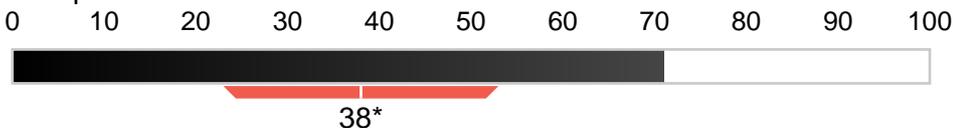

93

3. Receptive - People who are driven by new ideas, methods and opportunities that fall outside a defined system for living.

88

4. Commanding - People who are driven by status, recognition and control over personal freedom.

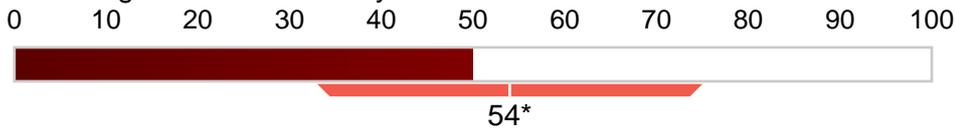

71

Situational Driving Forces Cluster

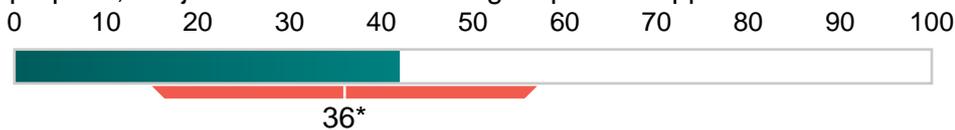

Your middle driving forces create a cluster of drivers that come in to play on a situational basis. While not as significant as your primary drivers, they can influence your actions in certain scenarios.

5. Intellectual - People who are driven by opportunities to learn, acquire knowledge and the discovery of truth.

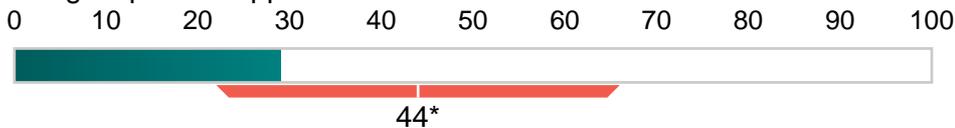

50

6. Intentional - People who are driven to assist others for a specific purpose, not just for the sake of being helpful or supportive.

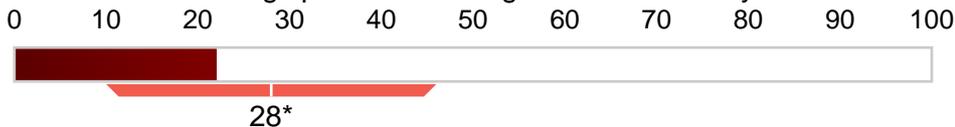

42

7. Altruistic - People who are driven to assist others for the satisfaction of being helpful or supportive.

29

8. Instinctive - People who are driven by utilizing past experiences, intuition and seeking specific knowledge when necessary.

22

Indifferent Driving Forces Cluster

You may feel indifferent toward some or all of the drivers in this cluster. However, the remaining factors may cause an adverse reaction when interacting with people who have one or more of these as a primary driving force.

9. Collaborative - People who are driven by being in a supporting role and contributing with little need for individual recognition.

Areas for Awareness

For years you have heard statements like, "Different strokes for different folks," "to each his own," and "people do things for their own reasons, not yours." When you are surrounded by people who share similar driving forces, you will fit in with the group and be energized. However, when surrounded by people whose driving forces are significantly different from yours, you may be perceived as out of the mainstream. These differences can induce stress or conflict.

This section reveals areas where your driving forces may be outside the mainstream and could lead to conflict. The further above the mean and outside the mainstream you are, the more people will notice your passion about that driving force. The further below the mean and outside the mainstream you are, the more people will notice your avoidance or indifference regarding that driving force. The shaded area for each driving force represents 68 percent of the population or scores that fall within one standard deviation above or below the national mean.

Introduction Integrating Behaviors and Driving Forces Section

The ultimate power behind increasing job satisfaction and performance comes from the blending of your behaviors and driving forces. Each individually is powerful in order to modify your actions, but the synergy of blending the two moves you to a whole new level.

In this section you will find:

- Potential Behavioural and Motivational Strengths
- Potential Behavioural and Motivational Conflict
- Ideal Environment
- Keys to Motivating
- Keys to Managing

Introduction Competencies

Your success in any job depends on the value of your contribution to the organization. Managers, mentors and professional coaches can encourage, advise and guide you as you grow professionally. However, the ultimate responsibility for your career development is yours and yours alone.

This report is designed to assist you in managing and developing your career. For many jobs, personal skills are as important as technical skills in producing superior performance. Personal skills are often transferable to different jobs, whereas technical skills are usually more specific.

Based on your responses to the DNA 25 questionnaire, this report indicates your development of 25 personal skills. These 25 personal skills contribute to superior performance in many jobs. Your development of these personal skills are categorized into four levels:

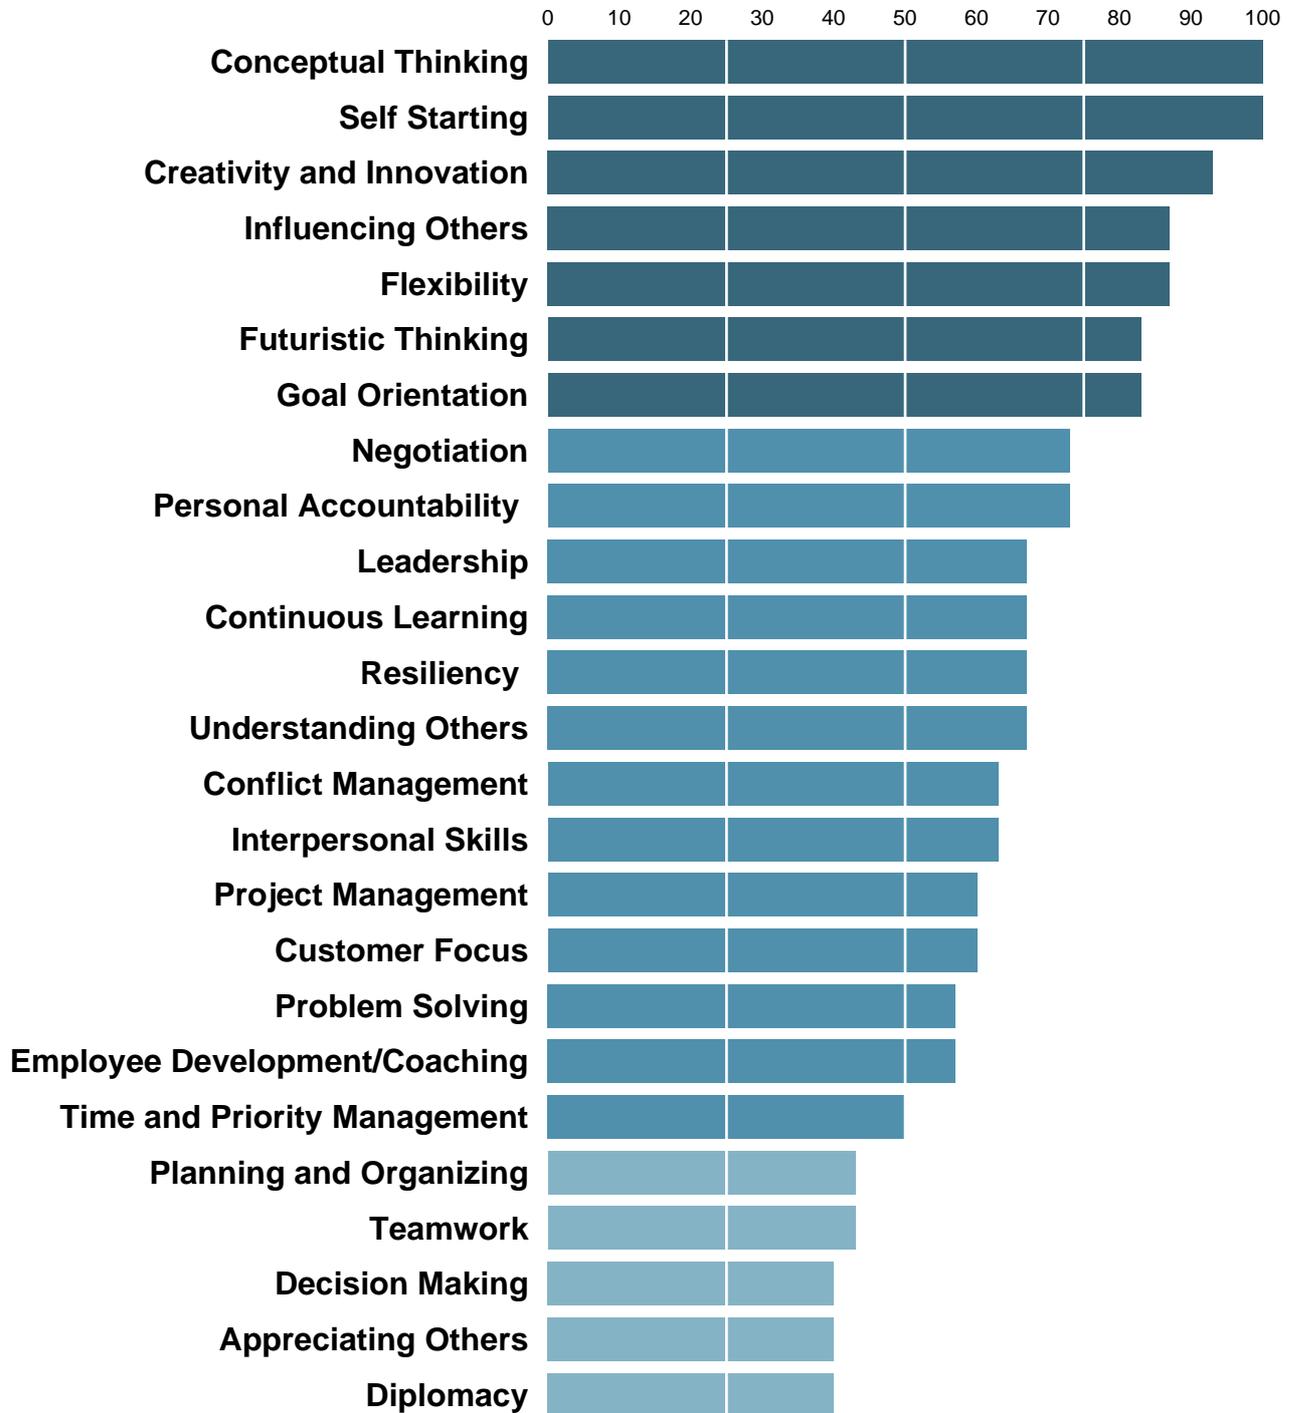

- 1) Well Developed
- 2) Developed
- 3) Moderately Developed
- 4) Needs Development

While personal skills are certainly important for career development, it is not necessary to fully develop every one. In fact, development of a personal skill may not benefit your career if it is not required in your current job. In order to optimize your career potential, it is best to focus your development efforts on the personal skills that are required in your current job, or the job you want.

Be sure to read the entire report with an open mind. Everyone has areas where they can improve. Before deciding to work on developing personal skills you have not yet fully developed, you may want to discuss the report with a trusted peer, mentor or professional coach. You may even wish to share the report with your manager. In most cases, management takes a very positive view of individuals who wish to develop their skills.

Development Indicator

This section of your report shows your development level of 25 personal skills based on your responses to the questionnaire.

Getting the Most From Your Report

Questions about the personal skills you are well developed in:

- Are you using the personal skills you are well developed in more in your personal or professional life?
- How is your development of these personal skills contributing to your success?
- How can you use these personal skills to advance your career, get a promotion or secure a better job?
- Do other people know that you are well developed in these personal skills?
- If not, what would be the benefit of sharing this information with them?

Questions about the personal skills in which you are developed and moderately developed:

- How has not fully developing these personal skills hindered your ability to succeed personally or professionally?
- Which of these personal skills might help you the most personally, if you developed them more thoroughly?
- Which of these personal skills might help you the most professionally, if you developed them more thoroughly?

Questions about the personal skills you have not yet developed:

- Which of these personal skills might help you the most personally, if you developed them?
- Which of these personal skills might help you the most professionally, if you developed them?
